FINAL EAXM (INTEGRATION PROJECT)

ANS 1: IN THE FRIST TIME WE NEED TO MEET THE CLEINT AND DISCUSE ABOUT THE PROJECT WHICH

HE WANTS TO DO BY FOLLOWING THESE STEPS WHICH ARE GIVE BELOW.

1. First sight (a priori)
2. Preliminary research
3. Client meeting(brief)
4. Mandate definition
5. Research

DO THIS THINGS IN BREIF AND WE CAN PROCCED IN NEXT STEPS.

ANS 2 : IN FIRST MEETING WITH THE CLEINT WE NEED TO DISSCUS MANY THING WITH THE CLEINT

SO WE CAN MAKE THE PROJECT WHICH HE/SHE WANTS . FOR EXAMPLES.

• What the customer wants to be done?

customer wants to design a website for his newly open shades trade for online shopping .

• What are the client's expectations?
the expectations of client is make the wedsite to attract the customers with color full desigens
and with relayable prices

• What are the constraints?
the constraints is the market compitation in present days for the client .

• For what reasons?
the reasons behind all this the cleint have an plan to sell is product in the international as long as with the
relative counntry.

• What are the primary and secondary goals at short, medium and long terms?
the primary goals that he start his trading with local market after that in the big markets and the secondry goal
is spreading his trades inn international markets for the long term.

• In what market?
local as well as internltional level.

• Targeted to what segment(s)?

tradeing in the shades which are aviable for al the ages peoples.

• What image does the customer want to present?
  customer wants show the images of theirs products with high revolations to satifaction for thier customers.

• Within what period of time?
  client wants his project wihtin 3 months

• Within what budget limit?
  he have a good budget for his project around 5000 $.

• Does the client have content material
  the client have some stuff for his project but not all.

• What involves the project in matter of work(content creation or only design and production?)
  he wants every thing form us like content creation aa long as design and production.

 Research :

• Short history of the client
  yes we have client history like who long he is working, company name and its reg. no etc.

• What is the actual image and business position of the client?
  he the ceo of his company and he handle all his business he is involve all activities in his company.

• What is the image and business position of the average and main competitors?
  before his business he was working with some another company and now started is own business and for the new arrivales have a lot of competitors.

• What is the market like?
  market is very good for this business and also in future.

• What image and benefits should the client present?
  the client have good and longlasting products with afortable prices.

• What should the customer offer (in the web site)?
      he sell his products withbest deals and he have a many offer on his products.

ANS 3   AFTER MEETING WITH THE FIRST MEETING WE MAKE theoretical solution TO THE CLIENT

  WE GIVE HIM/ HER THE PRODUCTION SCRIPT TO THE CLEINT SO HE NOWS THAT WHAT WE MAKE FOR HIM/HER. AFTER THAT WE MAKE THE GANTT CHART FOR THE CLEINT IN WHICH THE CLIENT NOW THAT WHAT TGINGS WE DO AND HOW MUCH MONEY HE/SHE NEED TO PAY US AND HOW MUCH TIME WE TAKE TO DO THAT THINGS A AND AT THE LAST WE MAKE A INVOICE FOR THE CLEINT IN WHICH THE CLEINT KNOW IN WHAT WAY HE HAVE TO PAY US .

ANS 4 : AFTER THE THE ACCEPT THE THERORETICAL SOLUTION THE NEXT PHASE TO DO IS MAKE A GANTT CHART FOR THE CLIENT AND THE PRODUCTION SCRITP FOR THE CLIENT SO HE KNOWS WHAT IS DO FOR HIM AND IN WHAT TIME . AND AFTER THAT WE HAVE TO MAKE HE PRODUCT WHAT IS WANTS .

ANS 5 : AFTER DOING EVERYTHING AND ACCEPTED FORM THE CLEINT WE HAVE TO MAKE FOR THE ALPHA VERSION WE CAN START THE PROJECT AND COMPLETE THE PROJECT AND THE CLEINT SEE IT AND HE NEED SOME MORE CHANGE ON IT. FOR EXAMPLE

=> Contract part is done.

=> Client: JACK

 => Software executive: KIM

 => We both agree on 5 functionality.

Alpha Version:

 => KIM has created a web app having those 4 functionalities.

=> KIM skipped 1 functionality.

 => JACK will review the code/ functionality.

=> JACK observed 5th functionality is not well written.

=> JACK will ping KIM , for fixing the 5th functionality.

ANS 6: AFTER ACCEPTING THE ALPHA VERSION THE NEXT PHASE FOR BETA VERISON LETS TAKE THE EXAMPLE FORM ANS 6 .

Beta Version:

=> KIM will pick the alpha version

=> KIM will fix the 5th functionality.

=> JACK will review the code/ functionality.

=> JACK finds everything good.

ANS 7: AFTER THE ACCEPT FOR BETA VERSION THE NEXT PHASE IS TO MAKE THE FINAL VERSION FOR THE CLEINT AND IT IS THE FULLAND FINAL PROJECT FOR THE CLIENT BY REVIEWINTHW CLEINT AFTER TAKE A LOOK ON ALPHA AND BETA VERSION . AND MAKE IT FINAL AND GIVE TO THE CLEINT AS A WEBSITE FOR THE CLIENT .
